RED FLAG CCA EXAM PREP

Writing the Prairie and International CCA exams?

This training is for you!

Learn the information you must know to pass these exams. Stay in your office and follow the webinar presentations, ask questions and work through the practice exams. You will be working through the study guides and the CCA manuals with heavy emphasis **on red flag concepts**. The training includes extra exercises with calculations.

Webinars are recorded and available for later review. This is the second time this team has presented this information.

The pass rate for the very tough CCA exam is excellent with comments from students "I would not have passed the exam if I had not taken the course."

| Time | Dates | Topic | | Instructor |
|------------------------|--------|----------------------------|---------------|------------------|
| 9:00 – 11:00 am MST | Dec 18 | Nutrient Management | International | Dr. Bill Hamman |

| | Jan 17 | | Prairies | Mike Dolinski |
| | Jan 22 | Crop Management | International | Therese Tompkins |
| | Jan 24 | | Prairies | Therese Tompkins |

INSTRUCTORS:

Dr. Bill Hamman, P.Ag., CCA and President of Hamman AG Research - Bill has instructed this CCA training 8 times over the last 15 years and is considered a top lecturer on the subject material. He also conducts the Alberta Pesticide Applicator Training course. He is President of Hamman AG Research based at Lethbridge, Alberta - a field research company that is well respected in the agriculture research community for fertility, weed, insect, disease, and cereal and oilseed development trials.

Therese Tompkins, BSc(Ag), CCA and Agronomist/Owner of Tompkins AgriWorks
 Therese currently provides agronomic consulting to farm operations west of Edmonton, Alberta. She has recently obtained her Pest Applicator certificate. Prior to consulting, Therese worked for our Provincial Government's Alberta Agriculture where she honed her teaching skills developing and delivering the Environmental Farm Plan Program.

Mike Dolinski, M.Sc. Entomology, M.P.M. and Owner of Sticky Wisdom Inc
 During his 30+ year career with Alberta Agriculture, Mike was involved in entomology, vertebrate pest management, apiculture, and organic agriculture. Since his retirement, he has spent hundreds of hours training agronomists on insect-related issues – identification, scouting, economics and integrated pest management. He also speaks widely on other topics related to plant physiology, growth, and nutrition.
