Join over 14,000 Certified Crop Advisers across North America!

Having a CCA designation provides growers and employers with the confidence that you have a recognized level of expertise as a crop consultant. These courses will prepare you for the certification exams. Included are over 1500 sample questions and specific training for calculations as well as a mock exam in a timed environment. Depending on your preference, you can enroll in both the Prairie Provinces and International versions, or just one of them. These courses are delivered through a mix of online learning, recorded class sessions, and webinars. All of the material for this course is online - there is no need to purchase books or manuals.

CERTIFIED CROP ADVISER

About the Facilitator

Thom Weir, CCA

Thom is a graduate in Agriculture with a degree from the University of Saskatchewan. He has practised agronomy for over 40 years. He has been a Certified Crop Adviser since 1997 and has been involved in training staff to challenge the CCA exams for 20 years. He was the past recipient of the CCA of the Year and Distinguished Agronomist Awards.

What Students Have to Say

"Great course to take. You have to put the time and effort into it to keep on pace. Lots of information with good questions at the end of each chapter. This will help you prepare for the exam as the test is all multiple choice." - Damon Paley
